

4 CHANNEL GAS MONITOR

- Individual voltage free relay contacts
- · Advanced digital readout
- User programmable
- Low power consumption
- Built-in battery backup circuit
- Alarm inhibit during calibration
- Individual 4-20mA analogue outputs
- Extensive fault detection firmware
- Sealed to IP65 rating
- RS485 communications interface
- Remote reset and accept terminals

Digital Signal Processing

Monicon have pioneered a novel approach to significantly reduce false alarms by processing the sensor signal through an advanced analysis program in the microprocessor. Monicon's digital signal processing algorithms are an innovative approach to compensate for the undesirable effects of RFI, Humidity changes, EMI, pressure changes, vibration and electrical noise.

Automatic self-test

The microprocessor implements a comprehensive self-test routine, continually monitoring the system's performance and functionality. The self-test routine examines the integrity of the system's electronic circuitry, system software, sensor cabling, sensor signal, ancillary cabling etc. In the unlikely event of a fault, the digital display will indicate the nature of the condition in a user-friendly diagnostic mode.

The Monicon 4 Channel Gas Monitor is an innovative, cost effective, wall mounted unit. It is designed to operate in conjunction with the T100 toxic gas detector and the highly successful CGS500 combustible gas sensor to monitor a range of toxic gases, combustible gases and oxygen in a wide range of applications. It will also operate with an IR100 infrared gas detector.

The 4 Channel Gas Monitor is also compatible with a wide range of third party 4-20mA transmitters including temperature probes. The gas concentration is indicated on a 4-digit, 7-segment display while another 2-character alphanumeric display indicates instrument status. A third display indicates the active channel.

Simple to use and microprocessor controlled, the 4 Channel Gas Monitor is menu assisted and fully user programmable for alarm setpoints, relay options, range, sensor type, gas type and many other parameters in a user friendly manner offering unique flexibility and control over the system.

The Monicon 4 Channel Gas Monitor has a builtin battery trickle charger circuit and an optional 12V, 1.2AH rechargeable battery (sealed lead-acid type) may be fitted inside the enclosure to ensure uninterrupted operation in the event of a mains power failure.

Careful product design and rigorous product testing combined with a stringent ISO9002 quality assurance program at Monicon's state-of-the-art manufacturing facility ensure ultimate reliability.

The Monicon 4 Channel Gas Monitor offers a robust, easy to use, cost effective approach to providing an effective gas monitoring system where safety matters.

4 Channel Gas Monitor Specifications

Mechanical Specifications

 Height
 230mm

 Width
 300mm

 Depth
 110mm

Weight 3.5Kg (including optional 1.2AH battery, if fitted)

Mounting holes 4 holes, Ø4.2mm, spaced at 200mm (vert) 288mm (horz)

Environmental Specifications

Operating temperature -18°C to $+66^{\circ}\text{C}$ Storage temperature -40°C to $+66^{\circ}\text{C}$

Humidity range 10%RH to 90%RH (Non-condensing)

Electrical Specifications

Supply voltage 230Vac (115Vac optional)

Power consumption 6W
Mains fuse 1A'T'

Transformer secondary fuse 1A PCB mounted 5 x 20mm fuse

Battery fuse 1.5A PCB mounted, auto reset, PTC fuse Sensor cables 3 core, screened, 0.5mm² to 1.5mm²

Relay contacts SPDT, 250V, 3A each for A1, A2, Common A3 & FAULT (10 relays)

Analogue outputs 4-20mA into maximum 250 Ω for each channel

RS485 operating mode

Max. units on RS485 loop

Slave mode, half duplex, polled
25 controllers (100 channels)

RS485 communications parameters 1200-N-8-1
RS485 error checking 1 byte checksum

Unit interrogation time 40mS

Battery operation time 1.2AH battery: typically 2 hours with all 4 detectors fitted

Battery voltage 12V

Battery type Sealed lead-acid

Combustible gas sensor type

Monicon CGS500 or compatible third-party sensor

Toxic gas sensor type

Monicon T100, or compatible 4-20mA transmitter

Stabilisation time

User selectable between 1 and 255 seconds

Annunciator output 2.5kHz, 84dB(A) @ 1m

Transient protection PCB mounted Metal Oxide Varistor

Terminations PCB headers & detachable terminal blocks up to for 1.5mm² cable
Option setting Digital setting (all options fitted as standard and user selectable)
Alarm setting Digital setting (fully adjustable between 10% and 90% of full scale)
Alarm types Energised/de-energised. Enrichment/deficiency. User selectable

Resolution 1%
Accuracy 5%

Full scale range 1.00 to 5000 (user selectable)
User variable storage Non-volatile RAM (EEPROM)

Enclosure material Two-piece, hinged, ABS or polycarbonate with neoprene gasket

Electromagnetic Conformance (EMC) Complies with EN50081 and EN50082

Literature supplied 30-page detailed instruction manual with wiring diagram
